

RELEASE NOTES

Product	Snow Inventory Agent for macOS
Version	6.0.1
Release date	2018-10-15
Content	Enhancements Corrections

ENHANCEMENTS

The following enhancements have been implemented in Snow Inventory Agent for macOS version 6.0.1:

- A new agent configuration setting has been added, `http.timeout`. This setting defines the timeout value, in seconds, for requests to the server endpoint. The default value is 15 seconds.

CORRECTIONS

The following corrections have been implemented in Snow Inventory Agent for macOS version 6.0.1:

- Corrected a bug that caused the agent to not be able to create inventory files, if the `script-output` folder is missing.

KNOWN LIMITATIONS

- This version is compatible with Inventory Server 6.0.0 and later.
- Version 10.7 and earlier versions of OSX are not supported.
