

# RELEASE NOTES

---

Product	Snow Inventory Agent for Windows
Version	5.3.0
Release date	2018-04-05
Content	Features Enhancements Corrections

## FEATURES

### *CLOUD APPLICATION METERING AND DISCOVERY FOR INTERNET EXPLORER 11*

This version of the Snow Inventory agent for Windows provides additional web-application metering functionality based on information provided by Internet Explorer. When Cloud Application metering is enabled in Snow Inventory Admin Console, the Inventory agent automatically installs an extension for Internet Explorer 11, which gathers detailed web-application usage data. The agent receives metering rules and patterns through its regular connection with the Inventory Server and includes findings along with the regular scan result.

### *CLOUD APPLICATION METERING AND DISCOVERY FOR MOZILLA FIREFOX*

This version of the Snow Inventory agent for Windows provides additional web-application metering functionality based on information provided by Firefox. When Cloud Application Metering is enabled in Snow Inventory Admin Console and the Inventory agent is correctly configured, the Inventory agent automatically installs an extension for Firefox, which gathers detailed web-application usage data. The agent receives metering rules and patterns through its regular connection with the Inventory Server and includes findings along with the regular scan result.

[Please read the User Guide for more information and known limitations.](#)

## ENHANCEMENTS

The following enhancements have been implemented in Snow Inventory Agent for Windows 5.3.0:

- Changes have been made to the chrome extension to ensure consistent behavior with other supported Snow browser extensions.
- All extensions (Google Chrome, Internet Explorer 11, and Firefox) can now be separately enabled/disabled by using the respective settings `saas.chrome.enabled`, `saas.ie11.enabled` and `saas.firefox.enabled` in the Agent configuration.
- The curl and zlib libraries have been updated to maintain compatibility and ensure that the latest vulnerability patches included in these libraries are applied.

## CORRECTIONS

The following correction has been implemented in Snow Inventory Agent for Windows 5.3.0:

- The Inventory Agent service no longer hangs when starting the agent service on a Citrix Server (PRB0040267).
