

# RELEASE NOTES

---

Product	Snow Inventory Oracle Scanner
Version	6.0.2
Release date	2019-07-31
Content	Corrections

## CORRECTIONS

The following corrections have been implemented in Snow Inventory Oracle Scanner version 6.0.2:

- An issue with detecting the ORACLE\_HOME variable when running on Windows operating system has been corrected (PRB0042118).
- Oracle Scanner now correctly executes in a context where the user name contains non-ASCII characters, including localized names for the Local System account in Windows (PRB0042388).
- Improved the detection for the options Spatial and Graph, Active Data Guard, Real Application Cluster, and Real Application Cluster One Node (PRB0042087).
