

RELEASE NOTES

Product	Snow Inventory Server
Version	6.0.2
Release date	2018-11-22
Content	Enhancements Known limitations

ENHANCEMENTS

The following enhancement has been implemented in Snow Inventory Server version 6.0.2:

Minor modifications have been made in the contract between Snow Inventory Server and Snow License Manager. These changes support the upcoming major release of Snow License Manager and relate to data quality and architecture modifications implemented in the Data Update Job for Snow License Manager 9. As such, this release of Snow Inventory Server is significant for customers planning to upgrade to Snow License Manager 9.

KNOWN LIMITATIONS

Disk-space information about the APFS file system (introduced in macOS High Sierra) and gathered by the Snow Inventory agent for macOS versions 6.0.1 and higher, is not yet fully supported by Snow Inventory Server. Full support will be provided in an upcoming release of Snow Inventory Server.
